CASE STUDY

Kendal Library

This public library needed to be modernised whilst incorporating a vast quantity of existing library shelving. A seamless and modern technology solution was required to maximise security and create space in both the main library and the second floor reference library.

New end panels and accessories were added to the existing library shelving to enhance aesthetics and improve flexibility. Library shelving was re-positioned to maximise the library space, create flow and enhance visitor experience.

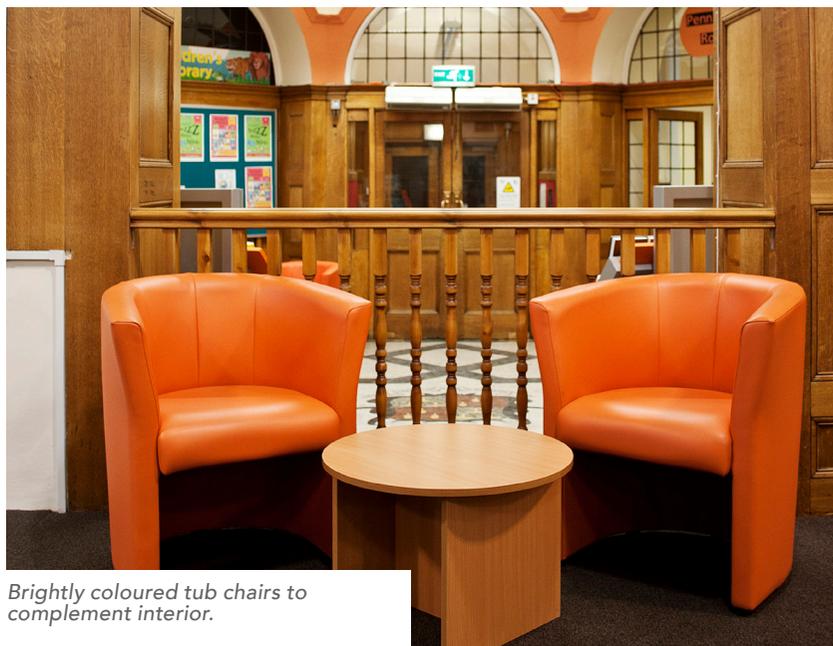

Modern colourful soft seating, tables and display units were chosen to complement the existing furniture, whilst being sympathetic to the traditional space.

KEY FEATURES

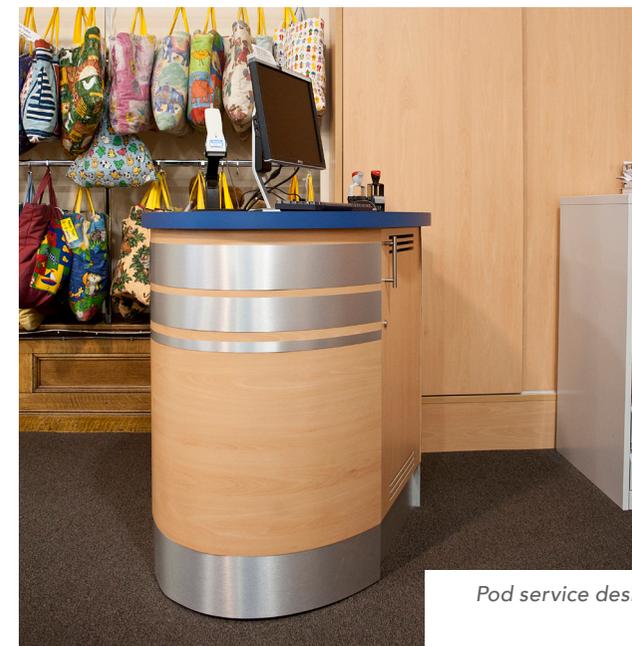

- Enhanced vast quantity of existing library shelving
- Bright bold furniture complements traditional space
- FG technology installed for maximum security and modern styling

Freedom display units situated at library entrance

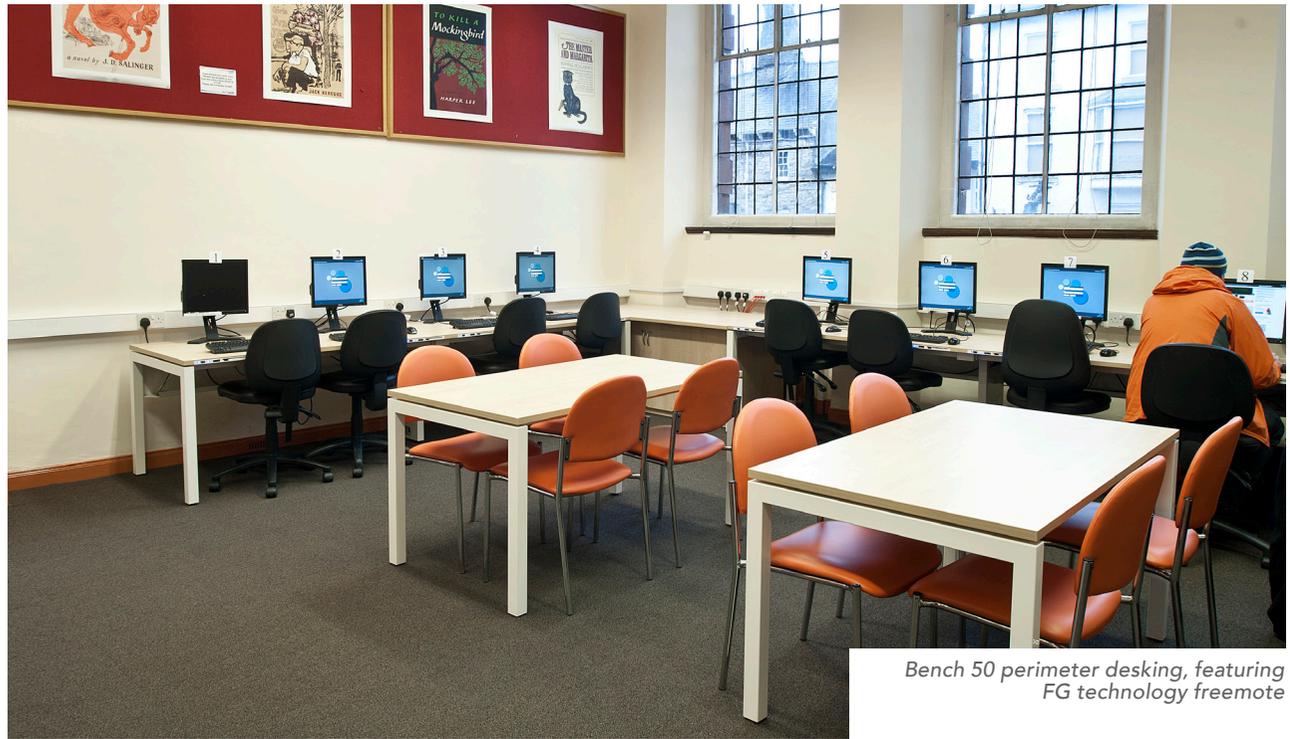

Brightly coloured tub chairs to complement interior.

Pod service desk

FG technology fitted to perimeter benching

Bench 50 perimeter desking, featuring FG technology freemote

Furniture in primary colours to suite with existing library shelving in childrens' area.

Green circular tables on 4 star base
